**Re: NYSDEC # 1-4726-00490/00010
110 Sand Company, 136 Bethpage-Spagnoli Rd., Melville
Renew Solid Waste Management Permit**

Dear Permittee:

In conformance with the requirements of the State Uniform Procedures Act (Article 70, ECL) and its implementing regulations (6NYCRR, Part 621) we are enclosing your permit.

Please carefully read all permit conditions and special permit conditions contained in the permit to ensure compliance during the term of the permit. If you are unable to comply with any conditions, please contact us at the above address.

Sincerely,

Kevin Kispert
Environmental Analyst II

MELVILLE, NY 11747

Facility Location: in HUNTINGTON in SUFFOLK COUNTY **Village:** MELVILLE
Facility Principal Reference Point: NYTM-E: 631.9 NYTM-N: 4514.2
Latitude: 40°46'05.5" Longitude: 73°26'13.7"

Authorized Activity: Renewal and Modification

Construct additional cells and continue operating an existing landfill receiving up to 6,000 tons per day, based on an annual average of 358 operating days each year. The annual maximum quantity of waste accepted shall not exceed 2,148,000 tons. The waste accepted at the facility shall be limited to concrete, steel, wood, sand, dirt, soil, glass, construction and demolition debris, and other recognizable inert material as designated by the Department.

This permit incorporates the renewal for Phases 7 through 10, and authorizes a modification to Phases 11 through 19 to construct landfill cells at lower elevations in these cells while maintaining the minimum 5 foot required separation from groundwater. Phases 11 through 16 are now Phases 11 through 19, as the permittee will now construct nine smaller cells rather than six larger cells. Phases 1 through 8 of this site are closed and in a post-closure care period. This permit also incorporates a solid waste management facility registration for the receipt and processing of recognizable uncontaminated concrete.

Sand mining activities at the site are regulated under permit no. 1-4726-00330/00003.

Solid Waste Management Facility No.: 52LR0351

Permit Authorizations

Solid Waste Management - Under Article 27, Title 7

Permit ID 1-4726-00490/00010

Renewal

Effective Date: 5/14/2021

Expiration Date: 5/13/2026

NYSDEC Approval

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, and all conditions included as part of this permit.

Permit Administrator: KEVIN A KISPERS, Deputy Permit Administrator

Address: NYSDEC Region 1 Headquarters
SUNY @ Stony Brook|50 Circle Rd
Stony Brook, NY 11790 -3409

Authorized Signature: 

Date 5/14/2021

Permit Components

SOLID WASTE MANAGEMENT PERMIT CONDITIONS

GENERAL CONDITIONS, APPLY TO ALL AUTHORIZED PERMITS

NOTIFICATION OF OTHER PERMITTEE OBLIGATIONS

SOLID WASTE MANAGEMENT PERMIT CONDITIONS

1. Conformance With Plans All activities authorized by this permit must be in strict conformance with the permit application, plans and materials prepared by the permittee or the permittee's consultant on the date(s) specified in Special Condition #2.

2. Terms of Operation, Approval for Changes The facility shall be operated in conformance with:

- a. Terms and conditions of this permit;
- b. Current 6 NYCRR Part 360 Solid Waste Management Facilities regulations, or any revisions hereafter promulgated;
- c. The approved Engineering Reports, Operation and Maintenance (O&M) Plans, Facility Manual, Environmental Monitoring Plan (EMP), and related documents outlined in this permit.

Any revision to the above approved documents identified in item (c) of this condition or to the operations at this site requires prior written approval from the Department. The permittee shall not add a facility component that would otherwise qualify as an exempt or registered facility, unless the permittee first receives a modified permit to incorporate the additional component of the operation.

If any of the above documents conflict with any condition of this permit, the permit condition shall prevail.

3. Authorized Activity - Landfill Construct additional cells and continue operating an existing landfill receiving up to 6,000 tons per day, based on an annual average of 358 operating days each year. The annual maximum quantity of waste accepted shall not exceed 2,148,000 tons. The waste accepted at the facility shall be limited to concrete, steel, wood, sand, dirt, soil, glass, construction and demolition debris, and other recognizable inert material as designated by the Department.

4. Authorized Activity - Concrete Crusher The permittee is also authorized to receive and process recognizable uncontaminated concrete in accordance with applicable requirements of this permit and the following:

- a. The permittee may receive and process up to 3,500 cubic yards per day of concrete.
- b. Unprocessed concrete shall not remain onsite for more than 18 months.
- c. The permittee shall not exceed 25,000 cubic yards of unprocessed concrete and 75,000 cubic yards of processed concrete.

The issuance of this permit replaces the permittee's solid waste management facility registration (Registration No. 52W12R).

5. Approved Documents for Phases 7 through 10 Unless a more recent document is approved or provides updated information, the following are the approved documents for Phases 7 through 10:

- a. Draft Environmental Impact Statement prepared by LKB, dated November 1994
- b. Engineering Report prepared by LKB, dated November 1994
- c. Operation and Maintenance Manual prepared by LKB, dated November 1994
- d. Operational Contingency Plan prepared by LKB, dated November 1994
- e. The Site Investigation Plan prepared by Geraghty and Miller, dated February 12, 1994
- f. The Site Analytical Plan prepared by Geraghty and Miller, dated September 3, 1994
- g. The Site Investigation Report prepared by Geraghty and Miller, dated January 6, 1995
- h. Engineering Plans for Phases 7 through 10 prepared by LKB, dated July 1995
- i. Variance Number 1, Leachate Storage, prepared by LKB, dated November 1994
- j. Variance Number 2, Pipe Slope, prepared by LKB, dated November 1994, as amended in plans prepared June 2, 1995 and May 10, 1995
- k. Variance Number 3, Leachate Collection, as described by LKB in documents dated November 1994
- l. Permit Application Revisions Correspondence prepared by LKB, dated July 13, 1995
- m. Construction Quality Assurance and Construction Quality Control Plan prepared by LKB, dated November 1994
- n. Environmental Monitoring Plan prepared by Geraghty & Miller Inc., dated April 3, 1995

6. Approved Documents for Phases 11 through 19 Unless a more recent document is approved or provides updated information, the following are the approved documents for Phases 11 through 19:

- a. Engineering Report prepared by LKB, dated June 16, 2014
- b. Operation and Maintenance Manual prepared by LKB, dated March, 2020, revised April 2021 (supersedes June 16, 2014 O&M Manual prepared by LKB)
- c. Operational Contingency Plan prepared by LKB, dated June 16, 2014
- d. Engineering Plans for Phases 11 through 19 prepared by LKB, dated June 16, 2014
- e. Site Analytical Plan prepared by LKB, dated June 16, 2014
- f. Environmental Monitoring Plan prepared by Arcadis, dated March 3, 2005; and updates prepared by LKB, dated June 16, 2014 and April 1, 2021
- g. Facility Manual prepared by LKB, dated March 2020 and revised April 2021
- h. Site Investigation Report prepared by Arcadis, dated September 2006

7. Submittals Required for Subsequent Phase Construction Starting with Phase 11, at least 180 days prior to the anticipated construction start date of construction for each subsequent phases, the permittee shall submit the following. Construction shall not commence without Department approval.

- a. Phase-specific Construction Plans and Technical Specifications
- b. Environmental Monitoring Plan updates, with verification of the currently accepted groundwater model
- c. Facility Manual Updates
- d. Construction Quality Assurance and Construction Quality Control (CQA/CQC) Plan
- e. Any necessary variance applications
- f. Any additional reports, information, or document updates required by the regulations in effect at the time of the submission

8. Environmental Monitoring Plan In the event that the suction lift pump system for the Phases 1-6 monitoring wells becomes unusable, the Environmental Monitoring Plan shall be amended to address any impact to on-site monitorability.

9. Submittal of Capping Plan Prior to placing waste in a new phase of the landfill, a capping plan in compliance with 6 NYCRR Part 360 for that phase must be submitted.

10. Variance Approvals The permittee may conduct landfill construction and operations in accordance with the following variance approvals:

a. **Leachate Collection Pipes:** The permittee may construct leachate collection and removal piping in accordance with the approved variance. No leachate collection and removal pipe shall be constructed to a pitch of less than a 0.5 percent slope. No transmission system pipe shall be constructed to a pitch of less than a 0.4 percent slope.

b. **Liner Protection Layer:** The liner protection layer may be constructed with 2 feet of select clean fill material (3 inches and smaller) installed over two feet of drainage sand over the primary liner. The area over collection pipes shall have four feet of drainage sand.

c. **Leachate Storage:** Leachate storage tanks are not required as long as the facility has a direct connection to the Suffolk County sewer system.

d. **Leachate Collection:** The variance allows for the utilization of a collection and removal system that combines leachate from operating and closed phases while allowing separate quantity monitoring.

11. Construction Certification The permittee shall not commence operations of a landfill phase until the Department approves the Construction Certification Report which must include liner performance data.

12. Unacceptable Wastes The permittee is prohibited from accepting the following type(s) of waste: municipal solid waste, sewage sludge, liquid waste, friable asbestos-containing waste, hazardous waste, regulated medical waste, industrial waste, radioactive waste.

13. Waste Placement The permittee shall place waste in lifts that do not exceed 10 feet in height.

14. Maximum Landfill Height The maximum landfill height upon closure shall not exceed 282.5 feet, excluding structures placed on top of the cap.

15. Leachate Collection Requirements The transfer of leachate on-site, whether via direct connection or transport vehicle, shall not allow leachate to be exposed to the open atmosphere. In the event that a spill occurs, it shall be immediately contained and disposed of and or treated with appropriate odor neutralizing agents such as activated carbon or lime.

Inspections of all leachate collection and removal system cleanout cables must be performed at a minimum of once every 6 months unless inspection logs indicate excess wear of the pipe network due to cable abrasion.

16. Landfill Gas Requirements The permittee shall inspect the landfill gas collection and destruction system a minimum of twice each day, and at a minimum, include the following:

- a. excessive subsidence of gas transmission pipes;
- b. collection of condensate within the transmission pipes;
- c. condensate drain condition;
- d. damage to any risers, flanges, and associated fittings;
- e. unstable or low temperature flame in the combustion chamber as indicated by the most recent Air State Facility Permit;
- f. repair or maintenance work necessary to gas or dilution air blower systems, or to the flame arrestor;
- g. operation of parameter monitoring equipment, including all thermocouple and wind direction monitoring equipment;
- h. verifiable persistent odors over 1 hour duration, noted on or off site;
- i. fissures noted on any slopes with a potential for erosion, or cracks noted in the vicinity of the gas collection or transmission system risers;
- j. security of area immediately surrounding the gas treatment system;
- k. Empirical observations regarding the rate of hydrogen sulfide generation used to evaluate the expected production of hydrogen sulfide from the landfill. This information shall be referenced in evaluations of the current gas destruction systems, and in designing retrofit, replacement, or expansion systems.

Any deviations from normal design or operational specifications must be recorded in a log available on-site; and any conditions lasting over 1 day in duration must be reported in the annual report.

17. Hours of Operation Hours of operation shall not conflict with any local laws or ordinances. The permittee shall limit the hours and days of operations from 5:30 A.M. to 5:30 P.M., Monday through Saturday. No operations of any kind are permitted on Sunday, unless the permittee provides the Department with a minimum of 48 hours notice for special circumstances or emergency projects.

18. Signs The permittee shall post signs showing hours of operation, and indicating that municipal solid waste, sewage sludge, liquid waste, friable asbestos-containing waste, hazardous waste, regulated medical waste, industrial waste, radioactive waste are prohibited from being accepted at the facility. The signs shall be located so that they are visible to any vehicles and/or person approaching the facility.

19. Waste Control An attendant shall be on duty during all hours of operation. The attendant shall inspect all vehicles entering the facility, rejecting any loads containing unauthorized material.

20. Control of Nuisance Conditions Odors, dust, insects, vectors, noise, blowing litter and other potential nuisances shall be adequately controlled at all times. The permittee shall immediately implement any controls required by the Department including cessation of all or part of the facility operations.

Dust control shall include the permittee applying water to road surfaces and the working face of the landfill. No other material may be used for dust control without first receiving Department approval.

21. Fire Protection and Detection The permittee shall maintain fire protection and detection equipment in accordance with local laws and ordinances.

22. Cessation of Operations The permittee shall verbally notify the Department within 18 hours of any occurrence of any event which causes the facility to cease operation for a period of 48 hours or more. Such an event would include a fire, spill, equipment breakdown, or similar event. A written report shall be submitted to the Department within 7 days of the event.

23. Unauthorized Waste In the event that any hazardous waste, medical waste, or other regulated waste not allowed under this permit is accepted at the facility, the unauthorized waste shall be contained and properly secured immediately. The permittee shall notify the Department and the Suffolk County Department of Health Services within 24 hours of the event. The waste material shall be removed by a waste transporter authorized under 6 NYCRR Part 364 to transport such waste. A written report shall be submitted to the Department within 7 days of the event.

24. Small Spill Containment The facility shall keep available at the site equipment and materials necessary to contain small quantities of chemicals or spills. These materials shall be stored in well identified accessible storage areas. As a minimum, the following must be available at all times:

- 4 - 55 gallon drums with covers and securing rings
- 400 lbs. absorbent material (e.g. Speedi-Dri)
- 50 lbs. Boric Acid
- 50 lbs. Sodium Bicarbonate
- Assorted brooms, shovels, gloves, masks, and other protective gear

25. Maintenance and Repair of Facility The permittee shall adequately maintain and make repairs to the facility as necessary. This includes any part of the facility, such as odor and dust controls and equipment, leachate pumps, and minimizing the ponding of stormwater.

The permittee shall undertake all repairs immediately and have all work completed within one week. Repairs related to dust or odor controls must be completed within 24 hours. If the permittee is unable to complete repairs within the specified time outlined by this condition, the permittee shall provide an acceptable schedule to the Department which shall include a description of the work to be completed and any controls that will be implemented to ensure the facility remains in compliance with this permit, including the cessation of all or part of the facility operations.

26. Recordkeeping Requirements The permittee shall maintain the following records at the facility for at least 7 years from the date of creation and be available immediately to the Department upon request:

- a. Daily log of solid waste received and transported from the facility which includes:
 - i. Type, quantity, and origin of the solid waste received.
 - ii. Quantity and destination of all recyclables.
 - iii. Quantity and destination of all non-recyclables and residuals transported for disposal.
- b. All weight tickets, hauling receipts, disposal receipts, invoices, tracking documents, etc. to support entries made into the daily log.
- c. All required landfill monitoring information.
- d. All submittals to the Department.

27. Reporting Requirements The permittee shall ensure all reporting is done in accordance with the following requirements:

- a. All quarterly and annual reports shall be completed on forms prescribed by or acceptable to the Department.
- b. Quarterly reports must include the following information:
 - i. Volume of waste received.
 - ii. Rejected material logs.
 - iii. Sampling and analysis data.
 - iv. Summary of operational problems and equipment breakdowns.
 - v. Estimates of the remaining landfill in graphical format. The abscissa of this graph is to represent the month of operation of the current phase. The ordinate is to indicate the cumulative volume both as received at the sale, and as calculated for in place volume.
 - vi. Action leakage rate information.
 - vii. Gas monitoring information.
 - viii. Summary of the most recent inspection of all cleanout cables used for the leachate collection and removal system.
 - x. Updates on construction of liners, collection systems, and capping systems.

c. Annual reports must include the following information:

- i. Cumulative hours of landfill flare or thermal oxidizer operation.
- ii. Updated closure and post-closure costs which must address inflation, renegotiated labor costs, and any additional consulting fees for the development of any and all associated reports and plans.
- iii. Project scheduling and any modifications to the scheduling.

d. Quarterly report submittal schedule:

1st Quarter	January 1 to March 31	Submit by May 31
2nd Quarter	April 1 to June 30	Submit by August 31
3rd Quarter	July 1 through September 30	Submit by November 30
4th Quarter	October 1 through December 31	Submit by March 1

e. Annual reports shall be submitted by March 1.

f. Original reports shall be submitted to the Region 1 Office located at the New York State Department of Environmental Conservation, Division of Materials Management, Circle Road, SUNY @ Stony Brook, NY 11790. In addition, copies of the submittals shall also be provided electronically in pdf format.

g. A copy of all reports shall be submitted to the Central Office at New York State Department of Environmental Conservation, Division of Materials Management, Bureau of Permitting and Planning, 625 Broadway, 9th Floor, Albany, NY 12233-7253.

28. Financial Assurance The permittee shall maintain the financial assurance in the amount approved by the Department based on the most recent Closure and Post Closure Cost Estimate Report. The financial assurance must be in place for all existing landfill phases, and 60 days prior to accepting waste for subsequent phases. Financial assurance documents language must be done in accordance with wording provided by the Department.

The Department reserves the right to adjust the amount of the financial assurance in the future to account for increases in closure costs, and for non-compliance with any conditions of this permit and any requirement of 6 NYCRR Part 360.

29. Environmental Monitor The environmental monitor shall be funded in accordance with the following:

- a. The permittee shall fund environmental monitoring services to be performed by or on behalf of the Department. These monitoring services will include, but not be limited to, the scope of work in an annual environmental monitoring work plan which is incorporated by reference and enforceable under this permit.
- b. The permittee shall provide to the Department on an annual basis the funds necessary to support the activities set forth in the annual environmental monitoring work plan. The sum to be provided will be based on the annual budgeted amount and is subject to annual revision. Subsequent annual payments shall be made for the duration of this permit or until the environmental monitoring services are no longer necessary, whichever comes first.
- c. The permittee shall be billed annually, prior to the start of each State Fiscal Year (SFY) (April 1). If this permit is to first become effective subsequent to April 1, the initial bill will be for an amount sufficient to meet the anticipated cost of the environmental monitoring services through the end of the current SFY.
- d. The Department may revise the required annual bill on an annual basis to include all of the Department's estimated costs associated with the environmental monitoring services. The annual revision may take into account such factors as inflation, salary increases, changes in the fringe benefits rate, changes in operating hours and procedures, changes in non-personal service costs (including travel, training, sampling and analytical, and equipment costs, etc.), an increase or decrease in the level of environmental monitoring services necessary, and an increase or decrease in the number of environmental monitors. Upon written request by the permittee, the Department shall provide the permittee with a written explanation of the basis for any revisions.
- e. Prior to making its annual payment, the permittee will receive, and have an opportunity to review, an annual environmental monitoring work plan that the Department will undertake during the year.
- f. Payments are to be made in advance of the period in which they will be expended and shall be made in full within 30 days of receiving a bill from the Department. The bill from the Department to the permittee will provide information regarding to whom payments should be made payable and the address to which payments should be sent.
- g. Failure to make the required payments shall be a violation of this permit. The Department reserves all rights to take appropriate action to enforce the above payment provisions.
- h. The environmental monitor shall, when present at any of the permittee's facilities, abide by all of the permittee's health and safety and operational requirements and policies, if such requirements and policies exist and provided they are not inconsistent with Department policies and labor management contracts, and further provided, however, that this shall not be construed as limiting the environmental monitor's powers as otherwise provided for by law and shall not result in the environmental monitor being afforded less protection than otherwise provided to the environmental monitor by State and Federal health and safety requirements.

i. The environmental monitor shall receive from the permittee all general and site-specific safety training which is normally given to new facility/site employees for all areas of the facility or site. This training will be a supplement to the health and safety training that the environmental monitor routinely receives from the Department.

j. The permittee shall immediately furnish to the environmental monitor any facility/site health and safety and operational requirements and policies. Within five (5) days of any revision to the facility/site health and safety and operational requirements and policies, the permittee shall furnish to the environmental monitor the health and safety and operational requirements and policies.

k. The environmental monitor shall be permitted to use environmental monitoring and data collection devices (e.g., photo ionization detectors, cameras, video recording devices, computers, cell phones, etc.) deemed necessary by the Department to evaluate and document observed conditions. The permittee may request the data and images collected from areas where confidentiality is a concern be considered confidential information if appropriate. Copies of the data or images collected from areas where confidentiality has been determined to be a concern shall be provided to the permittee.

l. It will remain the responsibility of the permittee to contact the Spill Hotline or any Division within the Department regarding any required notification of any spill, release, exceedances etc. Notification to the environmental monitor will not be considered sufficient to replace any required notifications.

GENERAL CONDITIONS - Apply to ALL Authorized Permits:

1. Facility Inspection by The Department The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71- 0301 and SAPA 401(3).

The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

2. Relationship of this Permit to Other Department Orders and Determinations Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

3. Applications For Permit Renewals, Modifications or Transfers The permittee must submit a separate written application to the Department for permit renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing. Submission of applications for permit renewal, modification or transfer are to be submitted to:

Regional Permit Administrator
NYSDEC Region 1 Headquarters
SUNY @ Stony Brook|50 Circle Rd
Stony Brook, NY 11790 -3409

4. Submission of Renewal Application The permittee must submit a renewal application at least 180 days before permit expiration for the following permit authorizations: Solid Waste Management.

5. Permit Modifications, Suspensions and Revocations by the Department The Department reserves the right to exercise all available authority to modify, suspend or revoke this permit. The grounds for modification, suspension or revocation include:

- a. materially false or inaccurate statements in the permit application or supporting papers;
- b. failure by the permittee to comply with any terms or conditions of the permit;
- c. exceeding the scope of the project as described in the permit application;
- d. newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e. noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

6. Permit Transfer Permits are transferrable unless specifically prohibited by statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

NOTIFICATION OF OTHER PERMITTEE OBLIGATIONS

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee, excepting state or federal agencies, expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees, and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under Article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.
